Sendgrid is a cloud-based SMTP provider that allows you to send email without having to maintain email servers.

```
Example: import sendgrid SENDGRID_API_KEY =
'SG.xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
xxx' sg = sendgrid.SendGridAPIClient(apikey=SENDGRID_API_KEY)
from_email = 'test@example.com' to_email = 'test@example.com'
subject = 'Sending with SendGrid is Fun' content = 'and easy to do
anywhere, even with Python' mail = Mail(from_email, subject,
to_email, content) response =
sg.client.mail.send.post(request_body=mail.get())
print(response.status_code) print(response.body)
print(response.headers)
```

```
1  # using SendGrid's Python Library
2  # https://github.com/sendgrid/sendgrid-python
3  import os
4  from sendgrid import SendGridAPIClient
5  from sendgrid.helpers.mail import Mail
6
7  message = Mail(
8      from_email='from_email@example.com',
9      to_emails='to@example.com',
10     subject='Sending with Twilio SendGrid',
11     html_content='<strong>and easy to do',
12     try:
13         sg = SendGridAPIClient(os.environ.get('SENDGRID_API_KEY'))
14         response = sg.send(message)
15         print(response.status_code)
16         print(response.body)
17         print(response.headers)
18     except Exception as e:
19         print(e.message)
```
